1. General Information

1.1 Purpose of the Interim Financial Statements

These interim financial statements are prepared in order to provide additional information other than that included in the most recent annual financial statements. Accordingly, these interim financial statements focus on the reporting of new activities, events and circumstances so as not to duplicate information previously reported. These interim financial statements should, therefore, be read in conjunction with the most recent annual financial statements.

1.2 Preparation of the Interim Financial Statements

These interim financial statements are prepared in accordance with Thai Accounting Standard No. 41 "Interim Financial Statements". The content of the interim financial statements comprises the balance sheets and statements of income, changes in shareholders' equity and cash flows, as presented in the most recent annual financial statements, together with the selected significant explanatory notes.

1.3 Basis of Preparation

The interim consolidated and Company's financial statements are prepared under the same basis as the consolidated and Company's financial statements for the year ended December 31, 2004.

During the first quarter of 2005, the Company sold its entire investment in the ordinary shares of SBFCI and SBDI, which are wholly owned by the Company, to SBECL, according to Note 6.4.

1.4 Summary of Significant Accounting Policies

The Company has prepared these interim financial statements by applying the same accounting policies and methods of computation as applied in the financial statements for the year ended December 31, 2004, which are prepared in accordance with generally accepted accounting principles.

1.5 Reclassification

For comparative purposes, the Group has reclassified certain items in the financial statements for the three-month and six-month periods ended June 30, 2004 and as at December 31, 2004 to be in accordance with the presentation in the financial statements for the three-month and six-month periods ended June 30, 2005.

2. Changes in Accounting Policies

2.1 Determination of Cost of Inventories

In 2004, the Company changed its determination of cost of inventories from first-in, first-out method to the weighted average cost method. This effects inventories and retained earnings as at January 1, 2004 to increase amounting to Baht 12.33 million.

2.2 The Recognition of the Incremental Value of Subsidiaries and Associates which Offer Their Securities to Public with Higher Prices than Par Value as Surplus on Share Capital

During the year 2004, the Company accounted for the increment of shareholders' equity of subsidiaries and associates arising from offering their securities to public with higher prices than par value as surplus on share capital in shareholders' equity of the Company.

This change resulted that the Company presented surplus on dilution of investments in subsidiaries and associates in shareholders' equity as at January 1, 2004 amounting to Baht 1,966.62 million and retained earnings decreased amounting to Baht 1,954.29 million, which is the net amount after deduction of the incremental retained earnings derived from the determination of cost of inventories amounting to Baht 12.33 million as stated in Note 2.1.
